

CPS iSeries Hosting

We are your best source for hosting your production, test or DR iSeries. Guaranteed!

Eliminate the large upfront costs of buying a new server and equipment along with ongoing maintenance costs. Plus get the benefit of a faster server. At the same time improve performance over your older server and give users better response times, making them more productive.

Benefits of iSeries hosting includes:

- A great solution to companies that can't replace iSeries expertise they have lost or are going to be losing
- Eliminate time consuming tasks including daily backups, PTF and patch management and tuning
- Business Class Data Center with redundant power and internet connectivity
- Very cost effective solution-in many cases less expensive than IBM maintenance charges
- Better security, performance, redundancy and response time
- Provides the foundation for a complete business continuity solution that meets your auditor's requirements

Find out how you can improve uptime, save money and remove stress.
